

Introduction Charging station integration

To activate charging stations, you must have an Eponet account on our portal portal.eponet.ch and a valid credit card on file for monthly billing of CHF 2 and CHF 0.01 per kWh for each charging point. Please contact us to activate monthly billing.

grafik.png

If you would like brand-independent Eponet load management, please check with Eponet in advance whether the desired charging station has been approved by Eponet for this function. Availability for activation on the Eponet portal does not mean that this model has also been approved for load management. Is your desired charging station not on the Eponet list? Please contact us!
